

INTERNET ACCESS

Wireless (wireless connectivity) Wireless + LAN/FTTH (hybrid connectivity)

Unlimited Internet access for you and your family.
An infinite world of knowledge, communication and entertainment.

In cases where the client's access point is located outside the territory covered by the Provider's cable network, the Internet access service can be ensured by means of wireless connectivity to the end user, or by establishing wireless connectivity to the populated place and building a local cable network within the populated place.

The technical infrastructure necessary for provision of the Internet access service by means of wireless connectivity is ensured by the Provider through installation of access points.

The access points are positioned at suitable locations and are provided with cable or wireless Internet connectivity. Where direct visibility to such access point is available, every customer can point their relevant equipment in the direction of the access point in order to establish wireless connection. The customer equipment is subject to approval and compatibility assessment by the Provider.

NOTES

- All parameters, speeds and prices in this offer are basic. A preliminary on-site visit to the customer address is made for preparing an individual offer based on location, remoteness, access and other specific factors that influence the parameters and the possibilities to maintain the service.
- All prices are VAT inclusive.
- The standard service installation includes installation of an antenna, basic connection to the Provider's network and setup of one terminal client device, and does not include the construction of an internal cable network. Any visit for additional installation, setup of additional equipment, wiring, laying cable ducts and others, shall be paid according to the Additional Services Tariff.
- The indicated speeds are the maximum achievable (non-guaranteed) speeds.
- Telnet Ltd is not responsible for the normal operation of the customer equipment and provides warranty service only when the equipment is purchased from the Provider.
- Telnet Ltd reserves the right to refuse to provide the service or to discontinue the service in case there is no technical possibility to ensure the minimum quality requirements.
